Art Unit: 1722

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 119-147 have been renumbered 48-76, respectively.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 48-50 and 67-76, drawn to a subcombination apparatus, classified in class 425, subclass 7.

II. Claims 51-66, drawn to a combination apparatus, classified in class 425, subclass 80.1.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the

Art Unit: 1722

instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require first and second fluid orifices, as required by the subcombination. The subcombination has separate utility such as for making fibers which are cooled and collected on a winder to make fiber product (i.e., NOT collected on a moving substrate to make a non-woven product).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
